TAB IV
MINUTES

A meeting of the District IV Local Emergency Planning Committee was held on Wednesday, February 12, 2014, at 10:00 a.m., at the Northeast Florida Regional Council, 6850 Belfort Oaks Place, Jacksonville, Florida. Chair Richard Knoff called the meeting to order with the following members:

Present
Morrison Braren – Facility Owner
Amy Pilgrim for Henry Bonar – Facility Owner
Terry Carr – Environmental
Sandi Courson – Health
Bill Decker – Environmental
George Faucher, Jr. – Firefighting
Gracie Kennedy – Local Environmental
William Lord – Facility Owner
Chief Richard Knoff – Firefighting
Jonathan Lamm – Firefighting
James Murphy – Community Group
John Russell – Environmental
John Ward – Emergency Management

Excused
Chief Michael Bazanos – Firefighting
Paul Christ - Transportation
Roger Studenski – Transportation
Sheriff Joey Dobson – Law Enforcement
Gerry Gividen – Interested Citizen
Ben Huron – Local Environmental
Charles Johnson – Firefighting
Harvey Silcox – Firefighting
Chief Joel Sneed – Firefighting
Ken Wilkey – Facility Owner

Absent
Quin Romay – Emergency Management
Andy Sikes – Hospital
Brad Elias – Health
Chief Mike Williams – Law Enforcement
Lt. John Scott, III – Firefighting
Lenny Ensalaco - Firefighting
Steven Millican – Emergency Management

Guests: Chris Porter, US Coast Guard
Andy Coen, Florida Air National Guard
Mitch Snead, Florida Air National Guard
Allison Allwine, Florida Air National Guard
Kenneth Thompson, Seminole Electric
Brian Teeple, NEFRC

Staff Present: Eric Anderson and Angelique Carnley

Chair Knoff called the meeting to order and led the pledge allegiance to the flag. He requested a roll call, which confirmed a quorum. The Chairperson then asked the guests to introduce themselves and he extended a special welcome to the guests.
*APPROVAL OF MINUTES*

Chair Knoff called for a motion to approve the August, 2013 minutes. A motion to approve was made by George Faucher, seconded by John Russell. The motion carried unanimously.

**CURRENT BUSINESS**

**Hazardous Material Emergency Preparedness (HMEP) Grant:** Mr. Anderson provided an overview of the Tabletop Exercise planned for St. Augustine on February 27th. He showed a video presentation on the increase in rail transport and possible safety defects.

The scenario for the Tabletop Exercise will be based on an incident that happened in Graniteville, South Carolina, in 2005. The Railroad Accident Report on this collision was included in the meeting Agenda Packet. Mr. Anderson discussed the proposed agencies who will be sending representatives to attend the exercise. The exercise will be reviewed at the next LEPC meeting, where scenario information and maps, along with observations and results will also be provided. Mr. Carr requested a copy of the powerpoint and provided comments regarding the need for training in this area. Chair Knoff commented that reaching out to rural volunteer fire departments is extremely important and he is hoping to increase participation in training. The Chair said he would reach out further to Chief Silcox in this regard.

**Training Updates:** Chair Knoff commented on the January TRANSCAER training, which he felt was excellent. Mr. Anderson said there were about 50 people in attendance per day. There was a grant provided, which covered meals for each day as well as other supplies. We trained about 100 for a total of $87. There was a comment on wishing that there was the ability to attend all three classes, rather than have to select two out of the three. Mr. Anderson said he will continue working with TRANSCAER to provide more training in the future. Chair Knoff said that TRANSCAER is driven by participation, so if there are more people interested, they will continue trainings.

Lt. Lamm provided an overview of the Second Annual Hazardous Materials Symposium, including a powerpoint presentation that he prepared on the symposium. Lt. Lamm said there was a great turnout. There were over 150 participants who registered for the symposium, which was attended by over 300, since attendance at the symposium was included in the Fire Rescue East Conference. SERC is onboard for the Symposium to be held again next year. Some of the instructors were from as far away as Maryland. Several classes were completely full. There was hands-on training along with classroom training, which provided actual scenarios. The HazMat competition used Level A Suits, which were donated — and participants were able to keep the suits afterward. Precautions were taken to provide Safety Officers and Evaluators to make sure everyone was safe. Mr. Lamm discussed the trophies that were awarded and praised the volunteers and sponsors. Chair Knoff complimented Lt. Lamm for his hard work on this project. He said his region sent 33 people from the LEPC district. Mr. Anderson said he has received more emails regarding how to get involved for next year’s symposium.

Mr. Anderson discussed the workshops he has been holding on “EPCRA - How to Comply”. He said that the three classes had over 100 people in total. He showed the folder and information that is being provided to the participants. The region is over 80% compliant with Tier II filing thus far this year.

Mr. Anderson went on to discuss two additional trainings scheduled for this year. First is the second in a series of Compressed Gasses, which is being held March 4, 5, and 6. He showed the flyer that was...
provided in the packet. He said that Ron Gore provides a lot of props, which makes his classes more interesting and hands on.

There will be three additional 8-hour trainings for Clandestine Drug Lab held in various areas throughout the region: Yulee in Nassau County; Green Cove Springs, in Clay County and Bunnell in Flagler County. There is a target of 24 participants each day. This will finish our fiscal year of training through July of this year. He feels we have been prudent with our training dollars this year.

**Hazards Analysis Update:** Mr. Anderson said there has been no decision from the Hazards Analysis Working Group regarding the recommendations to be made to the SERC at the April meeting.

**NEW BUSINESS**

A. **Training Task Force Update:** Lt. Lamm said they are still working with the Coast Guard. He also mentioned trying to get information out on E-Plan. Most of their efforts had gone to the Hazardous Materials Symposium.

B. **LEPC Chair/Staff Meeting:** Mr. Anderson said the group covered what the initial recommendations would be for the Hazards Analysis Working Group and a discussion on how to implement the program. The group needs to go back to the drawing board and engage in a larger open discussion. Mr. Robert Bing Crosby provided a presentation on their Anti-Terrorism Standards. Mr. Anderson said he may be asking Mr. Crosby to address the LEPC at their next meeting to discuss work being done in our region.

C. **SERC Meeting:** Chair Knoff said he attended the SERC meeting which basically covered what was discussed during Mr. Anderson's presentation on the Chair's meeting.

**REPORTS**

**Treasurer’s Report:** Chair Knoff said we did not have to use the CD balance to fund any part of the HazMat Symposium, although monies were approved for that use. Fortunately, sponsors were found to cover those expenses.

**Hazardous Materials Release Report** – Mr. Anderson said that under Section 304 investigations involving EHS – there were two in the District: Ethylene Oxide and Mineral Oil. He has not seen the follow up reports. There were also two Anhydrous Ammonia releases at the same facility during the same period, which indicates the facility didn’t learn anything with the first release. Mr. Anderson said we are working with the facility to remedy the situation. The EPA make levy fines and/or how to get them back into compliance and develop a response plan. Should a fine be levied, the facility could request a supplemental environmental project within the community. This works well for our side, to make the area safer. Mr. Anderson said he is following up on supplemental environmental projects and the possible creation of a data base. Chief Knoff said the EPA would contact the DEM, who would advise of possible projects and coordinates with the LEPC and other departments to negotiate with the spiller. Further discussion on the release ensued regarding determining reportable quantity. Mr. Anderson said the most important thing is to make the call.

There were no materials incidents and evacuations during the quarter. There was a diesel fuel incident with injuries involving 740 gallons of diesel fuel.
As of 7:00 last night, all of the rail cars involved in yesterday's derailment had been cleared, with the exception of the one that was overturned, which had been uprighted. The rail line was hoping to be operational by 11:30 last night and all fire operations had ceased. As of this morning a test train had gone through. It appeared to have been a 20 to 40 gallon spill. One of the LEPC members reported that there were between 5 and 9 ethanol tank cars on that particular train that derailed, and the overturned car was only about 75 feet away from the river. This was a Unit Train, which had been 82 and 92 tank cars of ethanol. Mr. Anderson that our region doesn't currently have an Ethanol Response Plan and he is checking into what stakeholders could be involved to create such a plan. It was felt that the recent TRANSCAER training was very beneficial to a lot of responders in this incident.

OTHER

Chair Knoff discussed the Thomas Yatabe Award, which was presented to Nassau County Engineer George Faucher at the SERC meeting in Daytona Beach. Mr. Anderson read the award letter, which was contained in the meeting agenda packet. Chair Knoff congratulated Mr. Faucher, who received applause from the group.

Mr. Anderson discussed the progress made thus far in the creation of a District 4 LEPC Website, which is being created in lieu of implementing the Public Information Campaign in January. He said he began doing research on that project, but decided to create an LEPC website for our region. He provided the template for the committee to review. The website will be a one-stop area for information to provide a resource to members. We will also be able to advertise our upcoming trainings. He hopes to have more information at the next meeting.

There were no comments from the public or guests.

Next Meeting – Chair Knoff announced the next quarterly meeting is scheduled for May 14, 2014 at the Northeast Regional Planning Council, 6850 Belfort Oaks Place, Jacksonville, Florida 32216.

ADJOURNMENT

There being no further business to come before the LEPC, Chair Knoff adjourned the meeting at 11:17 am.
TAB V – Ai
MEMORANDUM

DATE: May 5, 2014

MEMORANDUM

DATE: May 5, 2014
TO: District IV Local Emergency Planning Committee
FROM: Eric B. Anderson, LEPC Staff
RE: Hazardous Materials Emergency Preparedness (HMEP) Training Grant

Grant agreements/contracts have been received from the Florida Division of Emergency Management for the 2013/2014 fiscal year. The total contract amount of $38,370 was allocated for HMEP Training related activities. Refer to the sections below for more specific information regarding the grant.

Training Completed

- Clandestine Drug Labs – April 28 thru 30
  - Nassau County – 35 people
  - Clay County - 24 people
  - Flagler County – 35 LEPC sponsored & 30 Flagler County sponsored

Scheduled Training

- International Hazardous Materials Response Teams Conference – Baltimore, MD
- End of the Fiscal Year. New training year begins July 1, 2014

Upcoming Opportunities

- E-Plan for Responders – Lt. Johns Scott & Eric Anderson
- Rural County Summit – July 9-11 in Havana, Florida,
  - July 12 for volunteer organizations – free of charge

HMEP Training Grant vs. RTIPP Federally Funded Courses

- Discussion will follow regarding current training funds and access to new training opportunities (future funds)
**FREE**

8-hour Clandestine Drug Lab Course - *A Performance Oriented Training Course*

**DATES:** An 8-hour program presented 3 times, shift friendly

- **Monday, April 28, 2014 @ 9am – 5pm – 24 people**
  - Nassau County EOC - 77150 Citizen’s Circle, Yulee, 32097

- **Tuesday, April 29, 2014 @ 9am – 5pm – 24 people**
  - Clay County EOC - 2519 SR 16, Green Cove Springs, 32043

- **Wednesday, April 30, 2014 @ 9am – 5pm – 24 people**
  - Flagler County EOC (Room B) - 1769 E. Moody Blvd, Building #3, Bunnell, 32110

**Program Description:** This 8-hour course is related to the manufacturing of methamphetamine in clandestine drug labs. This course will emphasize clandestine drug labs and trends currently encountered in Florida, as well as make students aware of: equipment, chemicals, processes, & hazards associated with lab operations. This includes processes such as Red Phosphorus, Nazi/Birch, & One Pot Cook method.

The information contained in the lecture and hand-on approach is gained from first hand, real time knowledge encountered during response. This course includes scene stabilization of fixed and mobile clandestine drug labs, packaging and transporting evidence, and disposal options in today’s budget constrained environment. Discussion will also include site clean-up and transportation of over-packed materials.

**Who Should Attend?**

First Responders, Firefighters, Hazmat Technicians, Health Department, Environmental Regulatory Community, and Clean-Up Crews

☐ Monday, April 28, 2014  ☐ Tuesday, April 29, 2014  ☐ Wednesday, April 30, 2014

Community Disaster & Emergency Response

JULY 9-11, 2014
Florida Public Safety Institute
215 Academy Drive, Havana, FL

Special Session:
JULY 12, 2014

to accommodate volunteer organizations such as the Red Cross, Salvation Army, volunteer fire departments and auxiliary law enforcement officers

Guest speakers include emergency responders from the following disasters:
West, Texas | Moore, Oklahoma | Yarnell, Arizona | Boulder, Colorado
TAB V – Bi
MEMORANDUM

DATE:      May 5, 2014
TO:        District IV Local Emergency Planning Committee
FROM:      Eric B. Anderson, LEPC Staff
RE:        Hazards Analysis Update

The Hazards Analysis Working Group put forth a set of recommendations to the State Emergency Response Commission (SERC) regarding potential improvements to streamline the HA Program. Those recommendations were accepted, and a Scope of Work is currently being negotiated with FDEM.

The recommendations have been included for your review.
Hazards Analysis Recommendations

It is recommended that to streamline and localize the Hazards Analysis process that the Division should contract the Hazards Analyses creation and review process to the Regional Planning Councils. The Regional Planning Councils will contract to the Counties within their area that wish to conduct their analysis. The final analyses will be reviewed by LEPC staff, and approved by the LEPCs. The LEPCs will report to the SERC and Division all approved analyses.

The Division should develop an agreement with the Councils to implement this approach, that agreement will be developed using the following guidance:

1) The Funding levels to counties and RPCs to conduct the hazards analyses should remain the same or increase.
   a. Funding should be increased to the extent possible based upon the funding constraints.
   b. It is recognized that all funding is contingent on receipts received from the hazardous materials fee system.
   c. Funding to the Counties will not be reduced to provide funding to the Councils for review or sub-contract management.
   d. Counties may subcontract the hazards analysis.

2) A standardized set of review criteria will be used by all LEPC staff, to review the Hazards Analyses.
   a. The Division will work with the LEPC and staff to create a standard.
   b. The standard will be reported back to the SERC.
   c. The SERC encourages the staff to apply technology whenever possible to improve review speed and consistency.

3) Hazards Analysis standards will include:
   a. Each facility HA will be reviewed and updated biannually
   b. Each facility shall be visited or verified biannually
   c. Detailed review criteria
   d. If RPC staff conducts hazards analysis for a facility, that analysis must be reviewed against the standard criteria by a different staff person.

It is also the direction of the SERC that each LEPC shall establish a process for receiving review recommendations from staff and processing them for approval. This process will be reported to the SERC for transparency.

In summary; it is the intent of this process that the hazards analyses conducted in the State of Florida, should be developed, reviewed, and approved in a streamlined localized fashion. The management and review of the HA Program at a regional level is a logical fit, as it is ultimately the responsibility of the LEPCs to annually update their Plans as provided in the Emergency Planning and Community Right-to-Know Act (EPCRA). Combining service to be
provided by the Regional Planning Councils to the Counties with enabling the role of the LEPC as the approving entity, preparedness for local response will improve commensurate with local involvement in the process. These recommendations are meant to maintain the counties position in conducting Hazards Analysis as they currently stand today, while allowing for the local LEPCs to provide the review of such work. Additionally, by moving the review process to the LEPC, the LEPCs are better able to incorporate approved local Hazards Analysis work into the required annual update of the LEPC Hazardous Materials Response Plans and since these plans are then approved by the SERC, the review and approval process is completed.

TO: District IV Local Emergency Planning Committee
FROM: Eric B. Anderson, LEPC Staff
RE: Training Task Force Meeting

Summary

The TTF met April 3, 2014 in Tallahassee, Florida. The following were main points of discussion at the meeting:

  - Attendance Results, Hot Wash Notes, and Recommendations

- **Reduction in Statewide HazMat Assets** - the Fire Marshall’s Office is requesting that a needs/threat assessment be conducted. This assessment could then be used to justify if any of the Regional HazMat Teams would/should lose their designation as such. The request is that a group from outside the state conducts the assessment, so as to have an impartial analysis.

- **Progress Report - Presidential Executive Order 13650** – Update to be given later in the meeting under the “Others” section.

- **E-Plan Results** – 11,000 facilities reported hazardous chemicals using E-Plan this year. This is about 90% of all the facilities in the state, and 2,000 more facilities than last year.

- **TRANSCAER – Statewide Results** – 539 responders attended one of the four TRANSCAER events in the state (Pensacola, Jacksonville, Tampa, & Miami). Planning has begun for a TRANSCAER event in 2015, with the hopes of the first event to coincide with the 3rd Annual HazMat Symposium.

The goal for the 2015 TRANSCAER events is to provide train-the-trainer courses. This will help to build a group of professionals that can teach this important information within their respective departments and districts. They are also looking to develop some weekend classes so that volunteer agencies have an opportunity to attend.

President and Planning Manager

Preparing You Today for Tomorrow’s Challenges
2014 HazMat Training Symposium Hotwash Notes

Enclosed please find the Hotwash comments regarding the 2nd Annual HazMat Training Symposium held on January 23-24, 2014 in Daytona Beach, FL.

- Time and location for the 3rd Annual HazMat Training Symposium
  - The consensus of the Committee was to move the Symposium from January to the month of April.
  - Coordinate as to not conflict with the Fire Department Improvement Conference “FDIC” scheduled for April 20-25, 2015 in Indianapolis, IN as many of the potential presenters and attendees will be attending.
  - The consensus of the Committee was to maintain the location in the Central Florida area, but was open to learning more about the Nova University location in South Florida.
  - The consensus of the Committee was not to co-locate with the Fire Rescue East due to space limitations.
  - Combine the TTF, LEPC Chairs and SERC Meeting with the Symposium.

- Symposium Registration Desk
  - The Committee recommends purchasing a symposium banner that could be displayed at the Registration Desk. The banner should not be date specific as to allow repeated use. This is a primary need if the symposium continues to co-locate with Fire Rescue East.
  - The Committee recommends purchasing ink pens to help in establishing branding for the “Annual” HazMat Training Symposium.
  - The Committee recommends providing writing portfolios for attendees.
  - The Committee recommends that we provide a schedule to each attendee when they report to the Registration Desk.

- Symposium Registration Process
  - The Committee recommends the use of a web based registration process so the Committee has control over information.
  - The web based registration should allow for course specific signup helping coordinate presentation room setups and assignment of presentation rooms.
  - ECFRPC recommended the use of a pre-conference survey through Survey Monkey (free) to help plan the next symposium. Location, potential presentation topics, and presenters are of importance.
  - The Committee recommends that the host LEPC District coordinate both hotel contracts and symposium registration.
  - Establish a procedure for on-site registration of last minute attendees.

Preparing You Today for Tomorrow’s Challenges
• Symposium Registration Process continued
  o Matt Marshall recommends that each LEPC District submit attendee symposium applications and makes attendee hotel reservations to include paying the registration fee and hotel reservation for all attendees that are participating through their LEPC District. Only Individuals not participating through an LEPC will makes their own hotel reservation and submit their symposium application.
  o Paul Wotherspoon reminded the Committee that LEPCs/RPCs can cut checks almost immediately. The State’s check cutting process is too long. FDEM will reimburse the LEPCs/RPCs that follow the identified process. The LEPC will receive credit for student training hours for those individuals supported through their LEPC/RPC.
  o Jennifer Hobbs recommends that there must be a cost to the individual associated with attending the symposium, including the HazMat Competition even if that cost is paid through the LEPC to discourage no shows.

• Symposium Hotel
  o The Committee recommends the establishment of a cutoff date for hotel registration for presenters. If a presenter misses the cutoff date they forfeit the rate coverage for the assigned hotel nights.
  o The Committee recommends a single symposium hotel for housing all symposium staff and presenters.
  o It is recommended to use a single symposium hotel for all attendees as well.
  o The Committee recommends hiring an Event Management Planner to coordinate the hotel contract.

• HazMat Competition
  o All HazMat Competition attendees will check-in at the HazMat Symposium Registration Desk before the start of the competition.
  o Provide an indoor registration area for the HazMat Competition.
  o Provide a HazMat Competition briefing room for the HazMat Competition.
  o Provide a HazMat Competition holding area that is indoors in a room.
  o The HazMat Competition should take place before the start of the HazMat Training Symposium.
  o HazMat Competition timing will need to be managed with the addition of additional teams.
  o Vendor support for the HazMat Competition will be coordinated through a single point of contact on the Committee.

Preparing You Today for Tomorrow’s Challenges
• Improve coordination for an air fill station for the HazMat Competition.

• Improve coordination of Rehab and standby EMS coverage for the HazMat Competition.

• Provide a fully functional rehab if scheduled during a warm month.

• The HazMat Competition Awards Ceremony should be coordinated with the overall HazMat Training Symposium. If possible, presented during the SERC Meeting. The Awards Ceremony party was a nice touch.

• Prepare for potential adverse weather.

• HazMat Training Symposium Hands-On Skills Sessions
  • The Committee recommends better publicity and promotion of the Hands-On Skills Sessions.
  • Provide directional signage to the outdoor Hands-On Skills Sessions.
  • Try to minimize the conflict between lecture presentations and Hands-On Skills Sessions.
  • Prepare for potential adverse weather.

• HazMat Training Symposium Hands-On Skills Sessions continued
  • Focus future Hands-On Skills Sessions on HazMat Competition skills sets.
  • Improve the perimeter control around the Hands-On Skills Sessions for the safety of all involved.

• Next year’s HazMat Training Symposium
  • Work directly with the Florida State Fire College (FSFC) to secure attendee bar code labels for badges and the use of FSFC hand scanners for room monitoring sign-in.
  • Include the FSFC Specialist whom will be coordinating the attendee bar code labels and FSFC hand scanners on the HazMat Training Symposium Committee.
  • Include Susan Schell on HazMat Training Symposium Committee for coordination of training CEUs through the FSFC.
  • Provide individuals with presentation evaluation forms at the beginning of each presentation to allow attendees the opportunity to complete before exiting. Low return of evaluation forms this year.
  • Ensure that all HazMat Training Symposium Staff are provided with a contact list for staff members, presenters, and venue point of contact.
  • Provide an email list for the Symposium Command Group.
Next year's HazMat Training Symposium continued
  - Ensure that all HazMat Training Symposium Staff have staff shirts to be worn during symposium activities.
  - Provide HazMat Training Symposium shirts for attendees to purchase.
  - Set up HazMat Training Symposium IC structure to include:
    - Safety Officer
    - Operations Section
      - Presentation Branch
      - Hands-On Skills Branch
      - Competition Branch
    - Logistics Section
      - Transportation Unit
      - Facilities Unit (Hotel and Venue Site)
  - HazMat Training Symposium Exhibit
    - Include an Exhibit Area for exhibitors during the next HazMat Training Symposium.
    - The Committee recommends hiring an Event Management Planner to coordinate an Exhibit Area and exhibitors.
    - Smith Detection Company and Fisher Scientific have requested to be part of the next HazMat Training Symposium.

Respectfully submitted,

Lee Newsome

RE: LEPC Chairperson/Staff Meeting

Summary

The LEPC Chairperson/Staff meeting was held on April 3, 2014 in Tallahassee, Florida. The following were points of discussion at the meeting:

- Recommendations from the Hazards Analysis Working Group – already covered in the program updates for Hazards Analysis.

- Use of GATOR to potentially standardize hazards analysis data throughout the state. GATOR stands for Geospatial Analysis Tool for Operations and Response.

The next meeting of the LEPC Chair/Staff is scheduled for July, 2014 at Singer Island.

VII. ADJOURNMENT
The Geospatial Assessment Tool for Operations and Response, or GATOR, is the flagship common operation picture/situational awareness application for the Florida Division of Emergency Management and the State Emergency Response Team. GATOR is an interactive web mapping tool for the display of geographic information to support emergency preparedness, operations, and response. Real-time data like weather radar, weather watches and warnings, and tropical storm tracks are displayed along with base map data like roads, facilities, and aerial photographs.

GATOR is an Adobe Flex Application that displays REST web mapping services and GeoRSS.

Hover over each of these icons in the viewer window to see a drop down menu of available functions.

RE: Hazardous Materials Incident Reports

SUMMARY

The attached tables and graphs provide information on all hazardous materials incident reports received by the State Watch Office. The incident reports are reviewed by Hazardous Materials Planning staff on a daily basis for compliance and verification purposes. The information helps identify potential Section 304 violators, as well as facilities which may have an obligation to report under other sections of EPCRA and the Risk Management Planning (RMP) programs.

*Table 1* - lists incidents by LEPC District for the period of **December 1, 2013 through February 28, 2014.** "Potential Section 304 Investigations" are incidents involving the release of Extremely Hazardous Substances (EHS) or Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) chemicals at fixed facilities and are investigated by State-level staff. In order for an incident to be covered under Section 304, the EHS or CERCLA chemical must meet or exceed its designated Reportable Quantity (RQ) and have potential for offsite exposure.

*Table 2* - provides a breakdown for fixed facilities of all hazardous material incidents where evacuations, injuries or deaths were reported (where available).

*Table 3* - covers transportation related incidents and differentiates between chemical-related and traffic accident-related deaths. Please note that official causes of death are determined by the medical examiner’s office and may take up to 90 days for the final report.

*Graph I* - depicts total incidents within the State from **January 1, 2000 through February 28, 2014.**

*Graph II* - depicts total incidents within each LEPC District from **March 1, 2013 through February 28, 2014.**

*Attachments - Tables and Graphs*

TAB VII - B
MEMORANDUM

DATE: May 5, 2014

TO: District IV Local Emergency Planning Committee

FROM: Eric B. Anderson, LEPC Staff

RE: Presidential Executive Order 13650 – 135 Day Progress Report

Attached you will find the 135 day update to Presidential Executive Order 13650.

In the wake of the West, Texas fertilizer plant explosion President Obama signed Executive Order (EO) 13650 – Improving Chemical Facility Safety and Security.

The EO directed various federal agencies to establish a Chemical Facility Safety and Security Working Group to improve chemical facility safety and security in coordination with State regulators; State, local, and tribal emergency responders; chemical facility owners and operators; and local and tribal communities.

I have taken the liberty to highlight a few sections that I believe are important or that stood out when I read the report.
EXECUTIVE ORDER 13650

On August 1, 2013, the President issued Executive Order 13650 - 
Improving Chemical Facility Safety and Security (EO). The EO directs the 
Department of Homeland Security (DHS), the Environmental Protection 
Agency (EPA), the Department of Labor (DOL), the Department of Justice 
(DoJ), the Department of Agriculture (USDA), and the Department of 
Transportation (DOT) to establish a Chemical Facility Safety and Security 
Working Group to improve chemical facility safety and security in 
coordination with State regulators; State, local, and tribal emergency 
responders; chemical facility owners and operators; and local and tribal communities (hereafter referred to as stakeholders). This fact sheet provides an update to the December 20, 2013, Progress Fact Sheet on progress to address improvements in chemical facility safety and security, specifically stakeholder input, operational coordination with State, local, and Tribal partners, and efforts to modernize policies, programs, and requirements. Through this Progress Fact Sheet the Working Group is specifically inviting public input on actions described herein to improve stakeholder coordination.

Stakeholder Input

At stakeholder meetings and listening sessions organized by the Working Group, agencies have continued to solicit feedback, best practices, and suggestions from interested stakeholders. The Working Group recently completed its twelfth listening session. The Working Group webpage, www.osha.gov/chemicalexecutiveorder, is a one-stop location that provides information and accepts comments from interested parties. Stakeholders also can submit written comments through email at eo.chemical@hq.dhs.gov or via the regulations.gov website (http://www.regulations.gov/#/docketDetail?D=DHS-2013-0075).

Operational Coordination with State, Local, and Tribal Partners

Hazardous chemicals are located in many types of facilities and areas. Communities need to know where hazardous chemicals are used and stored; how to assess the risks associated with those chemicals; and how to ensure community preparedness for accidents or incidents that may occur. Many facility owners and operators rely on local resources for emergency preparedness and response, including first responders, emergency medical services, and hazardous materials response teams. It is important for facility owners and operators and their communities to foster strong relationships with one another and maintain a robust, open dialogue to help ensure chemical safety and security. Therefore, the EO directed the Working Group to develop a plan to support and further enable efforts by Federal regulators and stakeholders to work together to improve chemical safety and security.

February 2014
Based on issues, limitations, and needs identified in public listening sessions, meetings with stakeholder groups, webinars, and feedback submitted to the Federal agencies, the Working Group has developed a set of actions to improve stakeholder coordination in six key categories:

- Expand engagement of the chemical regulated community in the local emergency planning process.

- Improve training and protection for first responders, including a comprehensive implementation and compliance strategy for Hazardous Waste Operations and Emergency Response regulations.

- Provide further technical assistance to State Emergency Response Commissions (SERCs), Tribal Emergency Response Commission (TERCs), Local Emergency Planning Committees (LEPCs), and Tribal Emergency Planning Committees (TEPCs) preparedness activities.

- Identify and coordinate funding sources for LEPCs/TEPCs to sustain planning activities.

- Increase use of electronic reporting and data management.

- Improve public participation in LEPC/TEPCs emergency response planning and access to information about chemical facility risks.

The Working Group will further evaluate and refine the recommended actions as it obtains feedback and additional information from stakeholder groups, assesses resources, and prioritizes activities. We invite the public to submit comments on the proposed actions listed below. The public may submit comments to the public docket (http://www.regulations.gov/#/searchResults;rpp=25;po=0;s=OSHA-2013-0026;fp=true;ns=true, docket number OSHA-2013-0026) or by emailing EO.chemical@hq.dhs.gov.

**Expand Engagement of the Regulated Community in the Local Emergency Planning Process.**

While representatives from chemical facilities are involved in emergency-planning activities of some LEPCs, LEPCs noted that industry participation is not a consistent practice across the country and broader involvement across industry in this regard is needed. To improve participation in the local emergency planning process, the Working Group is working on the following short term action items:

- **Short Term**

  - During authorization and compliance inspections of Chemical Facility Anti-Terrorism Standards (CFATS) covered facilities, verify that emergency plans for security incidents are developed and coordinated with local law enforcement and first responders as required. As appropriate, expand Regional Response Teams (RRT) to include industry members to support and enhance communication during the emergency planning process.

---

1 The Superfund Amendments and Reauthorization Act (SARA) of 1986 created the Emergency Planning and Community Right-To-Know Act (EPCRA). EPCRA required the establishment of state/tribe emergency response commissions (SERCs/TERCs), responsible for coordinating certain emergency response activities and for appointing local emergency planning committees (LEPCs/TEPCs).

2 Short term actions are those anticipated to be completed by 2014.
- Develop and disseminate additional information for industry members, explaining roles and responsibilities in community emergency response planning and facility safety and security. In addition, establish a national electronic newsletter to improve education and information outreach to the regulated community.

- Assess the feasibility of reviving the Federal Integrated Contingency Plan (ICP), or “One Plan” facility reporting form to decrease duplication and streamline information collection. The “One-Plan” is an integrated contingency plan that allows a facility to comply with multiple Federal planning requirements by consolidating them into one functional emergency response plan.

- Develop guidance for LEPCs/TEPCs to engage facility owners and operators in the community emergency planning process and explain LEPC/TEPC authority under the Emergency Planning and Community Right-To-Know Act (EPCRA), including LEPC/TEPC authority to conduct on-site inspections and collect specific information on the location of hazardous chemicals.

- Working through the RRTs and with industry, identify opportunities to schedule chemical response exercises with federally regulated facilities and local first responders.

To improve participation in the local emergency planning process, the Working Group is evaluating the following medium to long term action items:

**Medium to Long Term**

- Provide best practices to SERCs, TERCs, LEPCs, and TEPCs on organizational design, staffing, and developing relationships with key local and facility representatives to increase effectiveness.

- Complete regulatory action to clarify EPA Risk Management Program (RMP) information requirements to explicitly indicate that facilities can only report as ‘non-responders’ if local public responders have the means to respond to a facility’s regulated substance and agree to respond. Otherwise, the facility must indicate itself as a responder.

- To the extent feasible, include LEPCs (including first responders and emergency planners) in Federal safety inspections at regulated facilities.

- Develop protocols for appropriately sharing facility inspection information and results (while ensuring protection of security and enforcement information) with LEPCs/TEPCs.

---

3 Medium and long term actions would be completed after 2014.
Improve Training for First Responders, Including a Comprehensive Implementation and Compliance Strategy for OSHA’s Hazardous Waste Operations and Emergency Response (HAZWOPER) Standard. Stakeholders, particularly local emergency responders, members of the local emergency planning committees, local residents, and facility operators, have noted the lack of a coordinated approach to emergency preparedness and response training. To address this, the Working Group is working on the following short term action items:

- Review existing courses and identify the most up-to-date training requirements for first responders.
- Provide a single, web-based portal on available training for first responders.
- Identify States where volunteers and public employees are not covered by health and safety standards and develop options to address any lack of coverage that is identified.

Provide Further Technical Assistance to SERCs, TERCs, LEPCs, and TEPCs on Prevention and Preparedness for Chemical Incidents. Input from State and local stakeholders indicate that LEPCs need assistance in contingency planning activities and analyzing the chemical information received from regulated facilities. To achieve this, the Working Group is working on the following short term action items:

**Short Term**

- Develop guidance to assist LEPCs/TEPCs in developing chemical facility emergency response plans that will promote the inclusion of all relevant community stakeholders (i.e., first responders, community residents, community groups, schools, industry, utilities, etc.).
- Establish a “community” via social media to promote information exchange, including lessons learned and best practices, as well as provide information on guidance and outreach materials, training schedules, etc. Within the “community,” seek opportunities for ‘peer-to-peer’ involvement to leverage experience and best practice applications.
- Work with States to improve SERC/TERC member orientation and training and conduct area/regional LEPC/TEPC workshops to provide technical assistance.

To improve participation in the local emergency planning process, the Working Group is evaluating the following medium to long term action items:

**Medium to Long Term**

- Establish a mechanism to send notifications regarding new information on chemical safety and security issues and activities to SERCs/TERCs and LEPCs/TEPCs (e.g., lessons learned from a chemical incident).
• Work with States to assist the SERCs to enhance their role as information-sharing (e.g., RMP, CFATS, and EPCRA Tier II facility and chemical information) organizations and central repositories for training, resources, and program summaries related to chemical facilities.

**Identify and Coordinate Funding Sources for LEPCs/TEPCs to Sustain Planning Activities.**
LEPC and TEPC access to funding for implementing community planning, preparedness, and response programs is not consistent. Stakeholders noted that better coordination of Federal grant funds and support for mutual aid agreements could assist with this need. To achieve this, the Working Group is working on the following short term action items:

**Short Term**
• Federal agencies will identify all potential resources (e.g., grants, technical assistance, fee systems, private sector funding) and best/successful practices to access funding and support, and provide that information to LEPCs/TEPCs.

• Work with FEMA to modify the examples in the allowable cost list in the FY15 Homeland Security Grant Program Funding Opportunity Announcement to clarify and amplify that planning, training, and exercises for chemical facility incidents are eligible as permitted by law.

To improve participation in the local emergency planning process, the Working Group is evaluating the following medium to long term action items:

**Medium to Long Term**
• Identify models for mutual aid agreements to lend assistance to LEPCs/TEPCs for chemical emergency planning and response activities.

• Develop a compendium of Federal preparedness funding sources that can be used for first responder training and exercises, such as the Pipeline and Hazardous Materials Safety Administration (PHMSA) Hazardous Materials Grant Program, which includes the Hazardous Material Emergency Preparedness, Hazardous Material Instructor Training, the Supplemental Public Sector Training grants, and the Homeland Security Grant Program.

• Develop a compendium of successful best practices for SERCs on mechanisms for establishing funding to support the EPCRA program.

**Increase Use of Electronic Reporting and Data Management.** State and local officials as well as first responders have noted that local contingency planning and response would be more effective if information provided by chemical facilities was electronically available to officials who need it. To achieve this, the Working Group is working on the following short term action items:

**Short Term**
• Work with first responders to develop guidance on facility specific chemical information, such as current and up-to-date quantity and location, needed during an emergency response,
ensuring that facilities provide 24-hour contact information and that emergency responders are aware of that information⁴.

- Make subject matter experts from Federal and State government available to assist emergency planners and first responders on accessing and understanding the various databases and the information contained therein.

To improve participation in the local emergency planning process, the Working Group is evaluating the following medium to long term action items:

**Medium to Long Term**

- Explore further expansion of the Computer-Aided Management of Emergency Operations (CAMEO)⁵ software suite to include OSHA information; develop a mobile device application; and consider additional initiatives to assist LEPCs/TEPCs in planning.

- Develop a web-based version of EPCRA Tier II Submit⁶ to facilitate State development of an internet reporting system, which can be integrated with existing delivery systems, and assist with the accuracy and completeness of EPCRA reporting requirements in lieu of other hazmat emergency management information portal systems.

- Leverage the DHS Homeland Security Information Network and other information-sharing tools and platforms to improve first-responder access to chemical facility security information that is not sensitive but is essential for response planning.

**Improve Public Participation in Emergency Response Planning and Access to Information about Chemical Risks.** In some communities, the public is not notified about chemical releases nor does it know how to respond if a chemical accident occurs (e.g., evacuate or shelter-in-place). Additionally, in some cases the public does not know about LEPCs/TEPCs or how to participate in the planning and preparedness process. To improve public engagement on these issues, the Working Group is working on the following short term action items:

**Short Term**

- Develop outreach materials and successful practices describing mechanisms for broadening LEPC/TEPCs membership to groups outside those listed in the EPCRA statute.

- Hold stakeholder training workshops / annual conferences to promote networking and information exchange.

---

⁴ EPCRA inventory information is submitted on an annual basis, the quantity and/or locations of chemical[s] at the facility may be different at the time of an incident, therefore, it would be useful for responders to be able to have up to the minute quantity and location information when they respond to an incident location.

⁵ The CAMEO software suite is a system of software applications used to assist LEPCs plan for chemical emergencies. LEPCs can use CAMEO to access, store, and evaluate information (i.e. EPCRA, RMP) that is critical for developing emergency plans. The CAMEO system integrates a chemical database and a method to manage the data, an air dispersion model, and a mapping capability.

⁶ EPA developed EPCRA Tier II Submit to help facilities prepare an electronic chemical inventory report and submit it to their SERC, LEPC, and fire department. Many States accept Tier II Submit, and the Tier II chemical inventory data can also be exported into the CAMEO emergency planning software.
To improve participation in the local emergency planning process, the Working Group is evaluating the following medium to long term action items:

**Medium to Long Term**

- Include non-government entities that play a role in emergency planning and response around chemical facilities in meetings with SERCs and LEPCs/TEPCs to identify methods of integrating these groups into planning prior to an emergency.

- Develop best practices and/or guidance on successful notification systems and implementing those systems, including reverse 911, sheltering in place, and evacuation.

- Identify planning processes and information sharing tools to address the need to improve communications on local chemical risk to the public.

These action items will continue the development of the “whole community” that is necessary to enhance the sharing of information, the exchange of ideas on lessons learned and best practices, and the development and distribution of guidance and tools on response procedures and local contingency planning to foster safety and security.

**Modernizing Policies, Programs, and Requirements**

Pursuant to Section 6(a) of the EO, the Working Group developed options to improve chemical facility risk management practices through agency programs, private sector initiatives, government guidance, outreach, standards, and regulations. To do so, the Working Group reviewed existing programs, lessons learned from major incidents, recommendations from the safety and security communities, and feedback from EO listening sessions. These options were released on January 3, 2014, to provide a starting point for additional stakeholder discussion. The stakeholder discussion and comment period, which continues through March 31, 2014, is a critical step in evaluating the feasibility and effectiveness of these options. Feedback on these options will inform a plan for implementing improvements to chemical risk management. This effort does not supersede official or standard processes for agency actions, such as notice and comment rulemaking. The options can be found at: https://www.osha.gov/chemicalexecutiveorder/Section_6ai_Options_List.html.

The RFI comment period for Section 6(e) of the EO, related to modernization of OSHA’ PSM and related standards, remains open until March 31, 2014. Both the RFI and instructions for submitting comments may be found at http://www.gpo.gov/fdsys/pkg/FR-2013-12-09/pdf/2013-29197.pdf.

The Working Group continues to pursue the directives of the EO and is committed to building on the existing coordination with State regulators; State, local, and tribal emergency responders; chemical facility owners and operators; and local and tribal communities to improve chemical facility safety and security.
TAB IX
MEMORANDUM

DATE: May 5, 2014
TO: District IV Local Emergency Planning Committee
FROM: Eric B. Anderson, LEPC Staff
RE: Next Meeting of the LEPC

The next meeting of the Local Emergency Planning Committee is scheduled to take place at the offices of the Northeast Florida Regional Council. The meeting will occur at 10am on Wednesday, August 13, 2014.

Northeast Florida Regional Council
6850 Belfort Oaks Place
Jacksonville, Florida 32216
